

2019 Cart Shed Project

We are trying to update our current listing of cart shed rentals. We have a really good updated list started, but have a few questions concerning a few sheds. There are a few sheds that have a lock on the doors and we do not know who is using these. **The following sheds #27 - #30 - #41 - #44 - #56 - #65,** have a lock. If we have not heard from the individual who is using this shed by February 28, 2019 we will cut the lock with a bolt cutter and see what if anything is inside. If you have one of these sheds please let a board member know.

1. We are asking our present shed renters to look honestly at their shed and ask yourself if there needs to be some updating of the outward appearance. They are very noticeable from most of the course and many of them are in need of repair. As a part of your rental agreement it is the responsibility of the golfer to maintain its outward appearance. Many of them just need a coat of paint, others some major repair. Please help our course by attending to your shed if needed. The board is going to try and spruce up some of the really bad ones this summer.
2. Golf season will be here before we know it and there will be many out and about. We want our facilities to be as good as possible. Thanks for your help in this matter.

Thank you,

Your Board of Directors
